

CCS Pattern Stamped Concrete

*Create the timeless
look of slate and stone*

CCS Pattern Stamped Concrete provides the look of random slate, wood or stone at a fraction of the cost and with much less maintenance required.

Applicators use multiple colours and textured mats on freshly laid concrete to create a rustic, attractive surface that will complement the surrounds of your home, landscape or development.

A variety of patterns and effects from cobble and slate, to wood finishes and European tiles are possible. Larger CCS stamping mats can also be utilised to create a seamless textured concrete surface.

For more information on the patterns and colours available, (including our complete range of pigments for integrally coloured concrete), please talk to your local applicator or visit www.concretecoloursystems.com.au.

1 This continuous rustic 'pattern-scape' is possible with the CCS Sierra Seamless Stone mat. Colours to use to achieve a similar look:- CCS Storm Grey and CCS Shale Grey with CCS Black Release Agent.

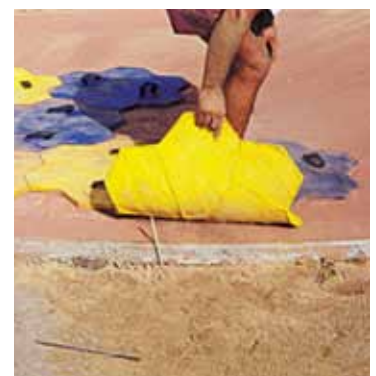

2 Above: A random rock finish creates an attractive walkway. Mat Design:- CCS Large Random Stone Mat Colours to use to achieve a similar look:- CCS Sandy Beige with CCS Rustic Brown Release Agent.

3 Above: This indoor café has been given added charm and character with the CCS Seamless Rough Stone finish. Colours to use to achieve a similar look:- CCS Terracotta and CCS Dark Terracotta with CCS Storm Grey Release Agent.

4 The patterned finish is created by placing the mats on the surface of the coloured concrete whilst it is still in its 'wet' state. The CCS stamping mats can also be used on fresh, integrally coloured concrete.

5 Recreate the colour, texture and smooth feel of timber without the splinters, termites and ongoing maintenance, using the CCS Boardwalk finish. Colours to use to achieve a similar look:- CCS Oatmeal with CCS Rustic Brown Release Agent.

6 The 'naturally appealing' slate patterns are both timeless and practical, particularly for driveways. Mat Design:- CCS Ashlar Slate Mat. Colours to use to achieve a similar look:- CCS Storm Grey with CCS Dark Black Release Agent.

All CCS products are manufactured in accordance with our Quality Management System certified as complying to ISO 9001.

DESIGN AND PRINTING LIMITATIONS

Pattern Stamped Concrete is created by hand, on site under varying weather and job conditions. By nature it is of a rustic appearance and consequently small variations in colour, texture and geometric precision are likely to occur. For people unfamiliar with the finished product, we recommend that you view jobs already completed by your decorative concreter to gain an understanding of the appearance. Although all efforts have been taken to accurately reproduce colours, limitations of the printing process will cause colours depicted in this guide to vary from the actual job. No reproduction without written permission from Concrete Colour Systems.

Note:- For the complete range of pigments for integrally coloured concrete, please visit www.concretecoloursystems.com.au or phone 1800 077 744.

Important: We recommend that you use our actual colour sample chips to make your final colour selection.
