

The Rembrandt Surface Colouring System For Interior Concrete Surfaces

The CCS Rembrandt Colour System is designed to cover existing interior concrete surfaces with a 2mm - 4mm resurfacing compound combined with attractive water based tints.

By utilising special troweling and colouring techniques, professional applicators can create a wide range of unique finishes such as marble, sandstone, tiles and wood grain textures.

Once the concrete has been resurfaced and coloured with the Rembrandt water based colours, it is then sealed with a CCS sealer to protect it from dirt and grime.

Note:- The CCS Rembrandt Colour System is only suitable for sound, uncoated concrete. Please refer to the CCS Rembrandt Application Guide for repair and preparation guidelines for cracked and uneven concrete.

USES

The CCS Rembrandt Colour System is ideal for internal domestic and light commercial floors. It is particularly popular in cafes and small retail shops.

FEATURES

- **Unlimited Style and Colour:** With a vast number of colour combinations and textures available, one is only limited by their own imagination.
- **Uniqueness:** No two floors can ever look exactly the same, as there are too many factors that determine the outcome of concrete staining.
- **Easy Maintenance:** Concrete is one of the strongest and most durable materials. It cannot be damaged as easily as other flooring materials. Once the floor is stained and sealed, periodic applications of floor polish or sealer is the only maintenance required.
- **Environmentally Friendly:** CCS Rembrandt Water Colours contain low Volatile Organic Compounds (VOC).
- **Cost:** Staining concrete is inexpensive compared to many other types of flooring.
- **Hygienic:** Smooth stained surfaces are an easy to clean, hygienic surface.

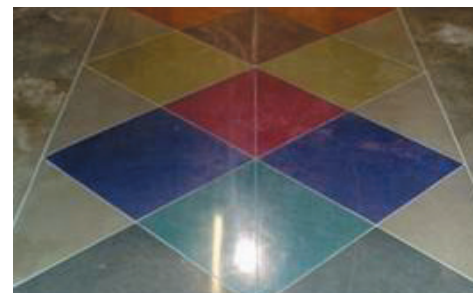

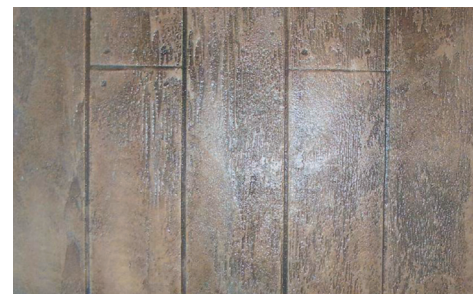

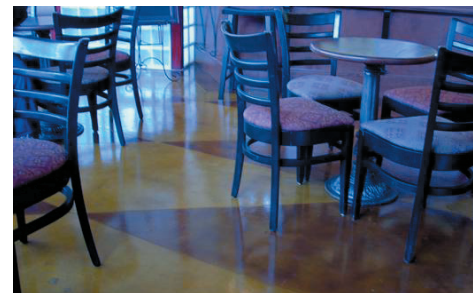

SYSTEM COMPONENTS

The CCS Rembrandt Colour System is made up of five parts:-

- Part 1: CCS Resurfacing Compound
- Part 2: CCS Super Polymer
- Part 3: CCS scribes and/or filament tape designs
- Part 4: CCS Rembrandt Water Colours
- Part 5: CCS top coat sealer (various sealers available).

Note: You can also apply CCS Rembrandt Water Colours to plain, sound concrete for a transparent colour look. Please refer to the CCS Rembrandt System data sheet for preparation and application information.

For further information refer to the each individual product data sheet and application guide or phone 07 3287 6444.
